

Stillwater Creek Biotechnical Stream Bank Stabilization Workshop Fundamentals Course

A Workshop in Stream Investigation, Stabilization and Design

Presented by:

Sacramento Watersheds Action Group and the Shasta College Foundation

- This 3.5-day workshop consists of, field instruction, classroom instruction and field trips. Learn methodologies for planning, analyzing, and designing long-term stream stabilization /restoration projects using various environmentally-sensitive stream bank stabilization techniques.
- This workshop also invites diverse stakeholders, including landowners, conservation groups, and local, county, state and federal agency personnel to participate in a roundtable discussion of potential stream restoration design techniques for Stillwater Creek. Such a diverse assemblage of personnel can provide an interdisciplinary design team which can efficiently put restoration dollars “on the ground”.
